What is « Slalom Skateboarding » ?

This sport is similar in every way to downhill and slalom skiing and consists of completing different slalom courses between the cones placed on the asphalt as quickly as possible.

Each passage of these sliding beasts is a technical feat which makes this spectacle always so captivating for the public, a combination of speed and dexterity which elicits “Look!” and “Wow!” for young and old alike!

Its mastery to achieve the best performances is acquired after years of practice during training and national and international competitions which take place each year throughout Europe, the United States, Brazil, Japan, Australia...

Skateboarding has earned its reputation over the years and generations who have developed, structured and promoted it across the four corners of the globe. Two disciplines of this highly competitive sport, Park and Street, will appear on the program for the 2024 Olympic Games in Paris.

The Organization

The RiderZ Association, affiliated with the French Roller Skating Federation (FFRS) joins forces with the International Slalom Skateboard Association (ISSA), and the Paris Roller and Skateboard Departmental Committee (CDRS75) , for the organization of the 2024 European Skateboard Slalom Championship in Massy.

RiderZ is an association dedicated to the promotion and development of skateboarding, and more particularly slalom, since 2002. The association, based in Paris, offers free activities open to all, with competent support staff. This allows us to introduce our practice to newbies, to increase the technical level of all practitioners, and to instill values of respect for others and mutual aid.

This competition was a great success in 2023, widely acclaimed by participants and organizers alike. We were able to benefit from the full support of Massy town hall, whether in terms of promotion, communication or logistics, thus enabling the realization of this event in the best conditions possible.
